

## HYDRALADA HI LIFT 440

The traditional Orchardist power ladder. Used for servicing overhead netting structures and medium size fruit trees.

The longer boom design delivers generous lift heights with flatter boom angles. The new rounder bonnet and lower tail design allow this new generation to work with minimal damage to your trees.

Fitted with various options, the Hi Lift machines from Hydralada will become your most versatile workmate. Work unobtrusively amongst trees, its remarkable manoeuvrability allowing the operator to access the workplace with ease.
